GRAPHICS COMPANION II

PROGRAM DISK REQUIRED

You've been super enthusiastic about our first Graphics Companion program. But you wanted more. We listened. We designed fresh graphics Canvases and new character Fonts. Then we went a step further and created two fabulous new features: Clip-Art Fonts and Border Fonts.

The result of all this is Graphics Companion II for Video Title Shop.

Clip-Art Fonts are graphics you actually type onto the Page. Dozens are available, covering sports, outdoor events, business, school, holidays, and more! Create exciting Sequences where Clip-Art Fonts scroll, fizzle or paint into view.

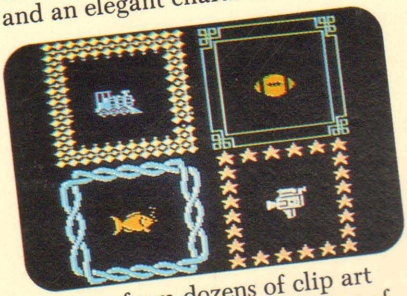
With the wonderful selection of Border Fonts, you have the power to put borders anywhere. Surround an entire Canvas or just a few words of text! And of course, Border Fonts can be utilized by Video Title Shop's amazing Sequence effects.

There's even a new selection of character Fonts so you can design Titles for any occasion.

Combining any of the Graphics Companion II font styles and additional Canvases brings your Video Title Shop productions into a new dimension.

Create an original full page canvas and add our clip art and character fonts.

Combine a border font, clip art and an elegant character font.



Choose from dozens of clip art graphics and a wide selection of border designs and sizes. Colors and placement on the page are up to you.
